Exclusion[®]

Monoprotein Veterinary Diet Formula

EXCLUSION MONOPROTEIN VETERINARY DIET FORMULA IS A COMPLETE LINE OF DIETETIC FOODS WITH A MONO-PROTEIN FORMULATION MADE WITH ALTERNATIVE SOURCES OF PROTEIN, INNOVATIVE INGREDIENTS, GLUTEN-FREE AND PRESERVED WITH NATURAL TOCOPHEROLS; IT REPRESENTS THE NUTRITIONAL RESPONSE AVAILABLE TO THE VETERINARIAN, DIFFERENTIATED BY SIZE AND IN THE DRY AND WET VERSION, SPECIFIC FOR THE TREATMENT OF THE MOST COMMON PATHOLOGIES OF DOGS AND CATS.

Monoprotein Veterinary Diet Formula

HYDROLYZED HYPOALLERGENIC

Exclusion Monoprotein Veterinary Diet Formula Hydrolyzed Hypoallergenic is a diet food with a monoprotein formulation, made with one single alternative source of low molecular weight hydrolyzed animal protein, a select source of carbohydrates and preserved with natural Tocopherols. Available for different sizes, it is a nutritional solution for Veterinarian looking to provide specific nutritional support for dog with adverse food reaction.

HYDROLYZED HYPOALLERGENIC: nutritional support for dogs with adverse food reaction

MONOPROTEIN FORMULA: single animal protein source to minimize the risk of adverse food reaction and dehydrated ingredients for a greater supply of nutrients

1+1: formulated with one single hydrolyzed animal protein source with low molecular weight and single carbohydrate source

LOW MOLECULAR PEPTIDES: hydrolyzed protein with low molecular weight to reduce the risk of adverse food reaction

CORN STARCH: corn starch to reduce the risk of adverse food reaction

OMEGA-3: Omega-3 fatty acids to promote a better condition of skin and coat

CELL OXIDATIVE DEFENSE: β-carotene, Vitamins E and C, which protect cells from free radicals

NATURAL PRESERVATION: only natural antioxidants to preserve food from oxidative damage

HYDROLYZED HYPOALLERGENIC ADULT HYDROLYZED FISH & CORN STARCH

Complete diet food with hydrolyzed animal monoprotein recipe for dogs with Averse Food Reaction

CHARACTERISTICS: Exclusion Diet Hydrolyzed Hypoallergenic Medium&Large Breed is a complete diet food formulated for adult dogs to reduce ingredient and nutrient intolerances. This complete diet food contains hydrolyzed protein source and selected carbohydrate source.

INSTRUCTIONS: reduction of ingredient and nutrient intolerances.

FORMAT: 2 kg

DRY FOOD SMALL BREED

COMPOSITION: corn starch (40%), hydrolysed fish proteins (26%), dried chicory pulp, sunflower oil, fish oil, monocalcic phosphate, calcium carbonate, sodium chloride, fructo-oligosaccharides.

ANALYTICAL CONSTITUENTS:

Crude protein	18%
Crude fats	18%
Omega-3 fatty acids	2,2%
EPA	0,8%
DHA	0,8%

Monoprotein Veterinary Diet Formula

HYPOALLERGENIC

Exclusion Monoprotein Veterinary Diet Formula Hypoallergenic, is a line of dietetic foods with a mono-protein formulation, made with one single alternative source of animal protein, innovative ingredients and preserved with natural Tocopherols, in which the sources of proteins that are potentially allergenic are excluded. To minimize the risk of sensitization to multiple ingredients. It represents the nutritional response available to the veterinarian as a nutritional support for dogs or cats with adverse food reaction.

HYPOALLERGENIC: nutritional support for dogs with adverse food reaction

MONOPROTEIN FORMULA: single animal protein source to minimize the risk of adverse food reaction and dehydrated ingredients for a greater supply of nutrients

1+1: formulated with one single dehydrated animal protein source and single carbohydrate source

GRAIN FREE: formulated without grains

DERMOPROTECTIVE SYSTEM: flax seed rich in essential fatty acids to promote a better condition of skin and coat

NATURAL BENEFIT: Aloe Vera, officinal plant as an anti-inflammatory support, thanks to its active ingredients

CELL OXIDATIVE DEFENSE: β -carotene, Vitamins E and C, which protect cells from free radicals

NATURAL PRESERVATION: only natural antioxidants to preserve food from oxidative damage

HYPOALLERGENIC PUPPY - ALL BREEDS PORK & PEA

Complete diet food with animal monoproduct recipe for puppies with food intolerance

CHARACTERISTICS: Exclusion Diet Hypoallergenic Pork and Pea Puppy All Breeds is a complete diet food formulated for puppies to reduce intolerances to ingredients and nutritive substances. This complete diet food contains selected protein and carbohydrate sources.

INSTRUCTIONS: puppies with food intolerance.

FORMAT: 2 kg - 12 kg

DRY FOOD

FORMAT: 200 gr - 400 gr

WET FOOD

COMPOSITION: pea (55%), dehydrated pork (25%), sunflower oil, hydrolyzed pork protein, flax seeds (1%), sodium chloride, fructo-oligosaccharides, glucosamine, aloe vera (0,04%), chondroitin sulphate, rosemary.

Monoprotein Veterinary Diet Formula

INTESTINAL

Exclusion Monoprotein Veterinary Diet Formula Intestinal is a dietetic food with a mono-protein formulation, made with one single alternative source of animal protein, innovative ingredients and preserved with natural Tocopherols. It represents the nutritional response available to the veterinarian as a nutritional support for dogs or cats with gastrointestinal diseases, maldigestion and malabsorption.

INTESTINAL: nutritional support for dogs with gastrointestinal disease, maldigestion and malabsorption

MONOPROTEIN FORMULA: single animal protein source to minimize the risk of adverse food reaction and dehydrated ingredients for a greater supply of nutrients

1+1: formulated with one single dehydrated animal protein source and single carbohydrate source

INTESTINAL HEALTH: β -Glucans strengthen the intestinal barriers and yeasts provide high nutritional value

FIBRE MIX: balanced blend of soluble and insoluble fibre, which rebalances intestinal transit, holding back excess water

FOS: improve the development of beneficial intestinal flora at expense of pathogenic one

MOS: promote the intestinal health binding to pathogenic bacteria and encouraging their elimination

NATURAL PRESERVATION: only natural antioxidants to preserve food from oxidative damage

INTESTINAL ALL BREEDS - PUPPY PORK & RICE

Complete diet food with animal monoproduct recipe for puppies with gastro-intestinal inflammatory disease, maldigestion and malabsorption

CHARACTERISTICS: Exclusion Diet Intestinal Puppy All Breeds is a complete diet food for puppies formulated for the reduction of acute intestinal absorptive disorder and for compensation for maldigestion. This complete dietetic food has an increased level of electrolytes, highly digestible ingredients and a low level of fat.

INSTRUCTIONS: puppies with inflammatory gastro-intestinal disease, maldigestion and malabsorption.

FORMAT: 800 gr - 2 kg - 12 kg

DRY FOOD

COMPOSITION: rice (36%), dehydrated pork (30%), pork fat, dried chicory pulp, dehydrated alfalfa, monocalcic phosphate, brewer's yeast (3,5%), potassium chloride, sodium chloride, pea fiber, flax seeds, mannan-oligosaccharides (0,4%), fructo-oligosaccharides (0,25%), psyllium husks and seeds, β -1,3/1,6 glucans from baker's yeast *Saccaromyces cerevisiae* (0,08%).

Monoprotein Veterinary Diet Formula

METABOLIC & MOBILITY

Exclusion Monoprotein Veterinary Diet Formula Metabolic & Mobility

is a complete and balanced monoproteic dietetic food, formulated to reduce excess weight and to promote joint mobility, it can be used until the ideal weight is reached.

It is formulated with 8 different fibers to reach satiety with a food with a reduced calorie intake:

3,077 kcal / kg.

Exclusion Diet Metabolic & Mobility contains high levels of EPA, Omega-3 fatty acids, β -glucans, glucosamine and chondroitin sulfate to reduce and slow down the joint disease (osteoarthritis).

It is available for adult dogs Small Breed version, for dogs weighting up to 10 kg or Medium and Large Breed, for dogs over 10 kg, both in the dry and wet version.

METABOLIC & MOBILITY: nutritional support to reduce excess weight and encourage joint mobility

MONOPROTEIN FORMULA: single animal protein source to minimize the risk of adverse food reaction and dehydrated ingredients for a greater supply of nutrients

1+8: formulated with one single dehydrated animal protein source and 8 fibre sources for greater satiety feeling and a correct intestinal absorption

WEIGHT REDUCTION: reduced caloric intake for effective weight loss

EPA - OMEGA 3: Omega-3 fatty acids regulate the inflammatory response, facilitating joint function

GLUCOSAMINE & CHONDROITINSULPHATE: glucosamine stimulates new cartilage production and chondroitin sulphate prevents its degradation

β -GLUCANS: β -1.3/1.6 Glucans derived from yeast *Saccharomyces Cerevisiae*, which help to reduce joint inflammation and enhance the immune system

NATURAL PRESERVATION: only natural antioxidants to preserve food from oxidative damage

METABOLIC & MOBILITY ADULT PORK & FIBRES

Complete diet food with animal monoproduct recipe to reduce body weight and encourage joint mobility

CHARACTERISTICS: Exclusion Diet Metabolic & Mobility Medium&Large Breed is a complete diet food for dogs formulated to reduce excess body weight and for the support the function of the joints in case of osteoarthritis. This complete dietetic food has an increased level of EPA, total omega-3 fatty acids and vitamin E and β -glucans.

INSTRUCTIONS: reduction of excess body weight and support of the metabolism of joints in case of osteoarthritis.

FORMAT: 2 kg

DRY FOOD SMALL BREED

COMPOSITION: dehydrated pork (21%), sorghum, pea, wood substances, dried beet pulp, hemp (4%), dried chicory pulp, dehydrated alfalfa, pork fat, oat fibre, salmon oil, hydrolyzed pork protein, yeast, sodium chloride, calcium carbonate, β -1,3/1,6 glucans from baker's yeast *Saccaromyces cerevisiae* (0,1%), glucosamine (0,06%), chondroitin sulphate (0,03%).

Monoprotein Veterinary Diet Formula

MOBILITY

Exclusion Monoprotein Veterinary Diet Formula Mobility is a dietetic food with a mono-protein formulation for adult dogs, specific for nutritional support during Osteoarthritis.

Exclusion Diet Mobility contains high levels of EPA, essential fatty acids Omega-3, Vitamin E and β -glucans and aims to reduce and slowdown the progression of the disease.

It is available for adult dogs Small Breed version, for dogs weighing up to 10 kg or Medium and Large Breed, for dogs over 10 kg, both in the dry and wet versions.

MOBILITY: nutritional support to encourage joint mobility

MONOPROTEIN FORMULA: single animal protein source to minimize the risk of adverse food reaction and dehydrated ingredients for a greater supply of nutrients

1+1: formulated with one single dehydrated animal protein source and single carbohydrate source

EPA - OMEGA 3: Omega-3 fatty acids regulate the inflammatory response, facilitating joint function

GLUCOSAMINE & CHONDROITINSULPHATE: glucosamine stimulates new cartilage production and chondroitin sulphate prevents its degradation

β -GLUCANS: β -1,3/1,6 Glucans derived from yeast *Saccharomyces Cerevisiae*, which help to reduce joint inflammation and enhance the immune system

CELL OXIDATIVE DEFENSE: β -carotene, Vitamins E and C, which protect cells from free radicals

NATURAL PRESERVATION: only natural antioxidants to preserve food from oxidative damage

MOBILITY ADULT PORK & RICE

Complete diet food with animal monoproduct recipe to help improve mobility

CHARACTERISTICS: Exclusion Diet Mobility Medium&Large Breed is a complete diet food for adult dogs formulated for support of the metabolism of joints in the case of osteoarthritis. This complete dietetic food has an increased level of EPA, total omega-3 fatty acids and vitamin E and β -glucans.

INSTRUCTIONS: support of the metabolism of joints in the case of osteoarthritis.

FORMAT: 2 kg

DRY FOOD SMALL BREED

COMPOSITION: rice (47%), dehydrated pork (17%), salmon oil, dehydrated alfalfa, dried beet pulp, pork fat, hydrolyzed pork protein, yeast, sodium chloride, dried chicory pulp, calcium carbonate, β -1,3/1,6 glucans from baker's yeast *Saccharomyces cerevisiae* (0,1%), glucosamine (0,06%), chondroitin sulphate (0,03%).

Monoprotein Veterinary Diet Formula

RENAL

Exclusion Monoprotein Veterinary Diet Formula Renal is a dietetic food with a mono-protein formulation for adult dogs, as a nutritional support for renal function during chronic or temporary renal failure. It is available for adult dogs in Small breed versions, for dogs weighing up to 10 kg or Medium & Large breed, for dogs over 10 kg, both in the dry and wet versions.

RENAL: nutritional support of renal function during or temporary renal insufficiency

MONOPROTEIN FORMULA: single animal protein source to minimize the risk of adverse food reaction and dehydrated ingredients for a greater supply of nutrients

1+2: formulated with one single dehydrated animal protein source and 2 carbohydrate sources

LOW PROTEIN: high-quality low protein content to relieve renal load

OMEGA 3: Omega-3 fatty acids to slow down the progression of renal insufficiency by modulating inflammation

LOW PHOSPHORUS AND SODIUM: low concentration of phosphorus and sodium to support kidney function

FOS: fructooligosaccharides to support intestinal flora and reduce urea

NATURAL PRESERVATION: only natural antioxidants to preserve food from oxidative damage

RENAL ADULT PORK & SORGHUM and RICE

Complete diet food with animal monoprotein recipe for dogs with renal insufficiency

CHARACTERISTICS: Exclusion Diet Renal is a complete diet food for adult dogs formulated to support renal function in cases of chronic or temporary renal insufficiency. This dietary food contains a low concentration of phosphorus and a reduced high quality protein content.

INSTRUCTIONS: adult dogs with chronic or temporary renal insufficiency.

FORMAT: 2 kg

DRY FOOD SMALL BREED

COMPOSITION: sorghum [40%], rice [25%], pork fat, dehydrated pork [8%], hydrolyzed pork protein, wood substances, salmon oil, camelina oil, yeast, potassium citrate [0,4%], fructo-oligosaccharides [0,2%], mannan-oligosaccharides, calcium carbonate, β -1,3/1,6 glucans from baker's yeast (*Saccaromyces cerevisiae*).

Monoprotein Veterinary Diet Formula

URINARY

Exclusion Monoprotein Veterinary Diet Formula Urinary is a dietetic food with a monoproteic formulation for adult dogs, as a nutritional support for the dissolution and reduction of relapses of struvite stones. It is available for adult dogs in Small breed versions, for dogs weighing up to 10 kg or Medium & Large breed, for dogs over 10 kg, both in the dry and wet versions.

URINARY: nutritional support for the dissolution and reduction of recurrences of struvite kidney stones

MONOPROTEIN FORMULA: single animal protein source to minimize the risk of adverse food reaction and dehydrated ingredients for a greater supply of nutrients

1+2: formulated with one single dehydrated animal protein source and 2 carbohydrate sources

LOW PH: acidification of urinary pH for the dissolution and reduction of recurrences of struvite kidney stones

LOW MAGNESIUM: low magnesium concentration to reduce the formation of struvite kidney stones

URINE DILUTION: dilution of urine to reduce the risk of formation of struvite kidney stones

FOS: fructooligosaccharides to support intestinal flora and reduce urea

NATURAL PRESERVATION: only natural antioxidants to preserve food from oxidative damage

URINARY ADULT PORK & SORGHUM and RICE

Complete diet food with animal monoproduct recipe for dogs with struvite stones

CHARACTERISTICS: Exclusion Diet Urinary is a complete diet food for adult dogs specially formulated for dissolving struvite-based kidney stones and for reducing their recurrence. This dietary food has urine acidifying properties, a low concentration of magnesium and a reduced high quality protein content.

INSTRUCTIONS: helps dissolve struvite-based stones and reduce their recurrence.

FORMAT: 2 kg

DRY FOOD SMALL BREED

COMPOSITION: sorghum (40%), rice (25%), dehydrated pork (12%), pork fat, hydrolyzed pork protein, wood substances, camelina oil, yeast, sodium chloride, potassium citrate (0,4%), fructo-oligosaccharides (0,2%), β -1,3/1,6 glucans from baker's yeast (*Saccaromyces cerevisiae*).

Monoprotein Veterinary Diet Formula

DIABETIC

Exclusion Monoprotein Veterinary Formula Diabetic is a diet food with a monoprotein formulation, made with one single alternative protein source and other innovative ingredients, all preserved with natural Tocopherols. Available for different sizes, it is a nutritional solution for veterinarians looking to provide nutritional support for regulation of glucose supply in case of Diabetes mellitus.

DIABETIC: nutritional glucose control support for diabetes mellitus

MONOPROTEIN FORMULA: single animal protein source to minimize the risk of adverse food reaction and dehydrated ingredients for a greater supply of nutrients

1+2: formulated with one single dehydrated animal protein source and 2 carbohydrate sources

LOW SUGAR: reduced carbohydrate intake and a low glycaemic index to limit blood glucose after meals

PSYLLIUM: helps to reduce postprandial glycaemia and gastric emptying

L-CARNITINE: L-carnitine boosts the conversion of fat into energy and helps to maintain lean muscle mass

β-GLUCANS: β-1,3/1,6 glucans, derived from *Saccharomyces Cerevisiae* yeast, help to control blood glucose, to reduce inflammation and to boost the immune system

NATURAL PRESERVATION: only natural antioxidants to preserve food from oxidative damage.

DIABETIC ADULT PORK & SORGHUM and PEA

Complete diet food with animal monoprotein recipe for dogs with diabetes mellitus

CHARACTERISTICS: Exclusion Diet Diabetic is a complete diet food for adult dogs formulated for the regulation of glucose supply in case of diabetes mellitus. This complete diet food has a low level of monosaccharides and disaccharides.

INSTRUCTIONS: regulation of glucose supply in case of Diabetes mellitus.

FORMAT: 2 kg

DRY FOOD SMALL BREED

COMPOSITION: dehydrated pork (27%), sorghum (25%), pea (20%), pork fat, dehydrated alfalfa, wood substances, hydrolyzed pork protein, dried chicory pulp, yeast, salmon oil, psyllium husks and seeds (1%), sodium chloride, β -1,3/1,6 glucans from baker's yeast *Saccaromyces cerevisiae* (0,1%).

Monoprotein Veterinary Diet Formula

HEPATIC

Exclusion Monoprotein Veterinary Formula Hepatic is a diet food with a monoprotein formulation, made with one single alternative protein source and other innovative ingredients, all preserved with natural Tocopherols. Available for different sizes, it is a nutritional solution for veterinarians looking to provide nutritional liver function support in the case of chronic liver insufficiency and reduction of copper in the liver.

HEPATIC: nutritional liver function support for chronic liver failure

MONOPROTEIN FORMULA: single animal protein source to minimize the risk of adverse food reaction and dehydrated ingredients for a greater supply of nutrients

1+2: formulated with one single dehydrated animal protein source and 2 carbohydrate sources

LOW COPPER: low copper content to limit accumulation in the liver

EPA - OMEGA 3: Omega-3 fatty acids to help slow the progression of liver disease by limiting inflammation

CELL OXIDATIVE DEFENSE: β-carotene and vitamins E and C to protect hepatocytes from oxidative damage

L-CARNITINA: L-carnitine helps to improve fat metabolism, limiting the risk of liver lipodosis

NATURAL PRESERVATION: only natural antioxidants to preserve food from oxidative damage

HEPATIC ADULT PORK & SORGHUM and RICE

Complete diet food with animal monoproduct recipe for dogs with chronic liver failure and for reducing copper accumulation in the liver

CHARACTERISTICS: Exclusion Diet Hepatic is a complete diet food for adult dogs formulated to support of liver function in the case of chronic liver insufficiency and reduction of copper in the liver. This complete diet food has a moderate level of protein, selected and highly digestible and a low copper content.

INSTRUCTIONS: support of liver function in the case of chronic liver insufficiency and reduction of copper in the liver.

FORMAT: 2 kg

DRY FOOD SMALL BREED

COMPOSITION: pea (30%), rice (25%), pork fat, dehydrated pork (10%), dried beet pulp, hydrolyzed pork protein, yeast, dried chicory pulp, wood substances, salmon oil, camelina oil, potassium chloride, calcium carbonate, psyllium husks and seeds, fructo-oligosaccharides, mannan-oligosaccharides, β -1,3/1,6 glucans from baker's yeast *Saccaromyces cerevisiae*.

Monoprotein Veterinary Diet Formula

HYPOALLERGENIC

Exclusion Monoprotein Veterinary Diet Formula Hypoallergenic is a diet food with a monoprotein formulation, made with one single alternative animal protein source and other innovative ingredients, all preserved with natural Tocopherols; it is the nutritional solution for veterinarian looking to provide specific nutritional support for cats with adverse food reaction.

HYPOALLERGENIC: nutritional support for cats with adverse food reaction

MONOPROTEIN FORMULA: Single animal protein source to minimize the risk of adverse food reaction and dehydrated ingredients for a greater supply of nutrients

1+1: formulated with one single dehydrated animal protein source and single carbohydrate source

GRAIN FREE: formulated without grains

EPA+DHA: Omega-3 fatty acids to modulate the inflammatory process favoring general wellbeing

MICROBIOME PLUS: FOS, MOS e GOS to promote intestinal health

CELL OXIDATIVE DEFENSE: β -carotene, Vitamins E and C to protect cells from free radicals

NATURAL PRESERVATION: natural antioxidants to preserve food from oxidative damage

HYPOALLERGENIC ADULT CATS PORK & POTATO

Complete diet food with animal monoprotein recipe for cats with food intolerance

CHARACTERISTICS: Exclusion Monoprotein Veterinary Diet Formula Hypoallergenic is a complete diet food formulated for adult cats to reduce intolerances to ingredients and nutritive substances. This complete diet food contains selected protein and carbohydrate sources.

INSTRUCTIONS: reduction of ingredient and nutrient intolerances.

FORMAT: 300 gr - 1,5 kg

DRY FOOD

COMPOSITION: potato (48%), dehydrated pork (32%), pork fat, hydrolyzed pork protein, salmon oil, monocalcic phosphate, calcium carbonate, sodium chloride, fructo-oligosaccharides (0,5%), galacto-oligosaccharides (0,5%), mannan-oligosaccharides (0,2%), β -1,3/1,6 glucans from baker's yeast *Saccaromyces cerevisiae*.

Monoprotein Veterinary Diet Formula

INTESTINAL

Exclusion Monoprotein Veterinary Diet Formula Intestinal is a diet food with a monoprotein formulation, made with one single alternative animal protein source and other innovative ingredients, all preserved with natural tocopherols; it is the nutritional solution for veterinarian looking to provide specific nutritional support for cats with maldigestion and malabsorption.

INTESTINAL: nutritional support for cats with maldigestion and malabsorption

MONOPROTEIN FORMULA: Single animal protein source to minimize the risk of adverse food reaction and dehydrated ingredients for a greater supply of nutrients

1+1: formulated with one single dehydrated animal protein source and single carbohydrate source

CELL OXIDATIVE DEFENSE: β -carotene, Vitamins E and C to protect cells from free radicals

FIBRE MIX: balanced blend of soluble and insoluble fibre, which rebalances intestinal transit, holding back excess water

MICROBIOME PLUS: FOS, MOS e GOS to promote intestinal health

EPA+DHA: Omega-3 fatty acids to modulate the inflammatory process favoring general wellbeing

NATURAL PRESERVATION: natural antioxidants to preserve food from oxidative damage

INTESTINAL ADULT CATS PORK & RICE

Complete diet food with animal monoproduct recipe for cats with maldigestion and malabsorption

CHARACTERISTICS: Exclusion Monoproduct Veterinary Diet Formula Intestinal is a complete adult cat diet food formulated to reduce intestinal absorptive disorder and to compensate maldigestion. This complete diet food is highly digestible with increased sodium and potassium.

INSTRUCTIONS: reduction of intestinal absorptive disorders and compensation for maldigestion.

FORMAT: 300 gr - 1,5 kg

DRY FOOD

COMPOSITION: dehydrated pork (34%), rice (34%), pork fat, dried chicory pulp, dehydrated alfalfa, hydrolyzed pork protein, salmon oil, yeast, monocalcic phosphate, potassium chloride, calcium carbonate, pea fiber, sodium chloride, fructo-oligosaccharides (0,5%), galacto-oligosaccharides (0,5%), psyllium husks and seeds, mannan-oligosaccharides (0,2%), β -1,3/1,6 glucans from baker's yeast *Saccharomyces cerevisiae*.

Monoprotein Veterinary Diet Formula

RENAL PHASE I

Exclusion Monoprotein Veterinary Diet Formula Renal Phase I is a diet food with a monoprotein formulation, made with one single alternative animal protein source and other innovative ingredients, all preserved with natural tocopherols; it is the nutritional solution for veterinarian looking to provide specific nutritional support for renal function in case of chronic renal insufficiency and for the reduction of oxalate stones formation in cats.

RENAL - PHASE I: nutritional support of renal function during chronic renal insufficiency and for the reduction of oxalate stones formation

MONOPROTEIN FORMULA: Single animal protein source to minimize the risk of adverse food reaction and dehydrated ingredients for a greater supply of nutrients

1+2: formulated with one single dehydrated animal protein source and 2 carbohydrate sources

LOW PROTEIN: high quality moderate protein content to relieve renal load

LOW OXALATE: low concentration of Calcium, Vitamin D and with urine alkalizing to reduce oxalate stones formation

LOW PHOSPHOROUS AND SODIUM: low concentration of phosphorus and sodium to support kidney function

MICROBIOME PLUS: FOS, MOS e GOS to promote intestinal health

NATURAL PRESERVATION: natural antioxidants to preserve food from oxidative damage

RENAL - PHASE I ADULT CATS PORK & PEA and RICE

Complete diet food with animal monoprotein recipe for adult cats with renal insufficiency and for the reduction of oxalate stones formation

CHARACTERISTICS: Exclusion Monoprotein Veterinary Diet Formula Renal Phase I is a complete diet food for adult cats formulated to support renal function in cases of chronic renal insufficiency. This diet food contains restricted high quality proteins and a low concentration of phosphorus. It is also formulated to reduce oxalate stone formation, through its low level of calcium, vitamin D and its urine alkalisng properties.

INSTRUCTION: support of renal function in case of chronic renal insufficiency and reduction of oxalate stone formation.
FORMAT: 300 gr - 1,5 kg FORMAT: 85 gr

Monoprotein Veterinary Diet Formula

URINARY

Exclusion Monoprotein Veterinary Diet Formula Urinary is a diet food with a monoprotein formulation, made with one single alternative animal protein source and other innovative ingredients, all preserved with natural tocopherols; it is the nutritional solution for veterinarian looking to provide specific nutritional support for dissolution and reduction of recurrences of struvite stones on cats.

URINARY: nutritional support for the dissolution and reduction of recurrences of struvite stones

MONOPROTEIN FORMULA: single animal protein source to minimize the risk of adverse food reaction and dehydrated ingredients for a greater supply of nutrients

1+2: formulated with one single dehydrated animal protein source and 2 carbohydrate sources

LOW pH: acidification of urinary pH for the dissolution and reduction of recurrences of struvite stones

LOW MAGNESIUM: low magnesium concentration to reduce the formation of struvite stones

URINE DILUTION: dilution of urine to reduce the risk of formation of struvite stones

MICROBIOME PLUS: FOS, MOS e GOS to promote intestinal health

NATURAL PRESERVATION: natural antioxidants to preserve food from oxidative damage

URINARY ADULT CATS PORK & PEA and RICE

Complete diet food with animal monoprotein recipe for adult cats with struvite stones

CHARACTERISTICS: Exclusion Monoprotein Veterinary Diet Formula Urinary is a complete diet food for adult cats formulated to dissolve struvite stones and reducing their recurrence. This dietary food has urine acidifying properties and a low level magnesium.

INSTRUCTIONS: dissolution of struvite stones and reduction of struvite stone recurrence.

FORMAT: 300 gr - 1,5 kg

DRY FOOD

COMPOSITION: dehydrated pork (30%), pea (24%), rice (16%), pork fat, dried chicory pulp, hydrolyzed pork protein, salmon oil, yeast, sodium chloride, potassium chloride, calcium sulphate dihydrate, fructo-oligosaccharides (0,5%), galacto-oligosaccharides (0,5%), mannan-oligosaccharides (0,2%), β -1,3/1,6 glucans from baker's yeast *Saccaromyces cerevisiae*.

Mediterraneo Monoprotein Formula

Exclusion[®]

Mediterraneo Monoprotein Formula

EXCLUSION MEDITERRANEO MONOPROTEIN FORMULA - NOBLE GRAIN IS A COMPLETE AND BALANCED FOOD, FORMULATED WITH ONE SINGLE DEHYDRATED ANIMAL PROTEIN SOURCE, FOR A CLEAR AND ESSENTIAL RECIPE AND ONLY ONE HIGH QUALITY NOBLE GRAIN. IT IS PRESERVED WITH NATURAL ANTIOXIDANTS AND INTEGRATED WITH BETA-GLUCANS.

IT'S ENRICHED WITH AN INNOVATIVE RECIPE OF SUPERFOODS FROM MEDITERRANEAN TRADITION: HEMP, OLIVE OIL, TOMATO, POMEGRANATE, BROCCOLI AND CHICORY. NO CHICKEN FAT, WHEAT, SOY AND CORN ADDED.

Mediterraneo Monoprotein Formula

DOG

Exclusion Mediterraneo Monoprotein Formula - Noble Grain is a complete and balanced food, formulated with one single dehydrated animal protein source, for a clear and essential recipe and only one high quality noble grain. It is preserved with natural antioxidants and integrated with Beta-glucans. It's enriched with an innovative recipe of Superfoods from Mediterranean tradition: Hemp, Olive oil, Tomato, Pomegranate, Broccoli and Chicory. No chicken fat, wheat, soy and corn added.

MONOPROTEIN FORMULA: a single dehydrated animal protein source for more nutrients support. Essential and clear recipe for a protein support, fit to dog nutrition needs

NOBLE GRAIN: formulated with only one noble cereal of high quality. No Corn - Wheat - Soy added

MEDITERRANEAN SUPERFOOD: hemp, olive oil, tomato, pomegranate, broccoli and chicory rich in antioxidants that neutralize free radicals and help to protect from oxidative damage

IMMUNO DEFENSE: β -1,3 glucans from algae *Euglena gracilis* help to increase immune system, promoting the organism wellbeing

JOINT HEALTH: Glucosamine and Chondroitin Sulphate help to promote the development and maintenance of healthy joints

SHINING COAT: Camelina oil helps to improve skin health and coat brightness

NO CHICKEN FAT ADDED

NATURAL PRESERVATION: only natural antioxidants to help to maintain food freshness and palatability

FORMAT: 500 gr - 2 kg

SMALL BREED PUPPY CHICKEN

Complete food formulated with one animal protein source for small breed (2-10 kg) puppies (2-10 months)

COMPOSITION: dehydrated chicken (34%), rice, pea, pork fat, hydrolysed animal proteins with low molecular weight, hemp (1%), yeast, dehydrated alfalfa, dried chicory pulp (0,5%), sodium chloride, camelina oil (0,3%), olive oil (0,3%), fructo-oligosaccharides, β-1,3 glucans from algae Euglena gracilis (0,06%), glucosamine (0,04%), dehydrated broccoli (0,03%), pomegranate dehydrated (0,03%), tomato dehydrated (0,03%), mojava yucca, chondroitin sulphate (0,01%).

Exclusion[®]

Mediterraneo Monoprotein Formula

EXCLUSION MEDITERRANEO MONOPROTEIN FORMULA – NOBLE GRAIN IS A COMPLETE AND BALANCED FOOD, FORMULATED WITH ONE SINGLE DEHYDRATED ANIMAL PROTEIN SOURCE, FOR A CLEAR AND ESSENTIAL RECIPE AND ONLY ONE HIGH QUALITY NOBLE GRAIN. THE SPECIFIC FORMULA HELPS TO KEEP THE URINARY TRACT HEALTHY AND IT IS PRESERVED WITH NATURAL ANTIOXIDANTS. IT IS ENRICHED WITH AN INNOVATIVE RECIPE OF SUPERFOODS FROM MEDITERRANEAN TRADITION: POMEGRANATE, BLACKBERRIES, RASPBERRIES AND BLUEBERRIES. IT IS ENRICHED WITH PSYLLIUM, THAT HELPS TO PREVENT THE FORMATION OF HAIRBALLS. NO CHICKEN FAT, WHEAT, SOY AND CORN ADDED.

Mediterraneo Monoprotein Formula

CAT

Exclusion Mediterraneo Monoprotein Formula – Noble Grain is a complete and balanced food, formulated with one single dehydrated animal protein source, for a clear and essential recipe and only one high quality noble grain. The specific formula helps to keep the urinary tract healthy and it is preserved with natural antioxidants. It is enriched with an innovative recipe of Superfoods from Mediterranean tradition: pomegranate, blackberries, raspberries and blueberries. It is enriched with psyllium, that helps to prevent the formation of hairballs. No chicken fat, wheat, soy and corn added.

MONOPROTEIN FORMULA: A single dehydrated animal protein source for more nutrients support. Essential and clear recipe for a protein support, fit to cat nutrition needs

NOBLE GRAIN: NO Corn – Wheat – Soy added. Formulated with only one noble cereal of high quality

URINARY SYSTEM: specific recipe to help maintain the health of urinary system

MEDITERRANEAN SUPERFOOD: pomegranate, blackberries, raspberries and blueberries rich in antioxidants that neutralize free radicals and help to protect the body from oxidative damage

HAIRBALL SYSTEM: psyllium and lignocellulose are natural fibre that help to prevent the formation of hairballs, and favour their expulsion

SHINING COAT: salmon oil helps to improve skin health and coat brightness

PREBIOTIC SYSTEM: FOS & MOS to help balancing the intestinal microbiome, aiding good digestion

NATURAL PRESERVATION: only natural antioxidants to help maintain food freshness and palatability

FORMAT: 300 gr - 1,5 kg

KITTEN CHICKEN

Complete food formulated with one single animal protein source, for kittens from 2 to 12 months

Composition: dehydrated chicken (32%), pea, rice, pork fat, yeast, hydrolysed animal proteins with low molecular weight, dried chicory pulp, salmon oil (1%), wood substances (1%), fructo-oligosaccharides (0,5%), sodium chloride, psyllium husks and seeds (0,3%), mannan-oligosaccharides (0,3%), pomegranate dehydrated (0,1%), dehydrated blueberry (0,1%), blackberry dehydrated (0,1%), red raspberry dehydrated (0,1%), mojavé yucca.
